

Lab Experiment_Week-5.2

Name: Shaik Naved Ahmed

Reg.no: 2303A54053

Batch - 47B

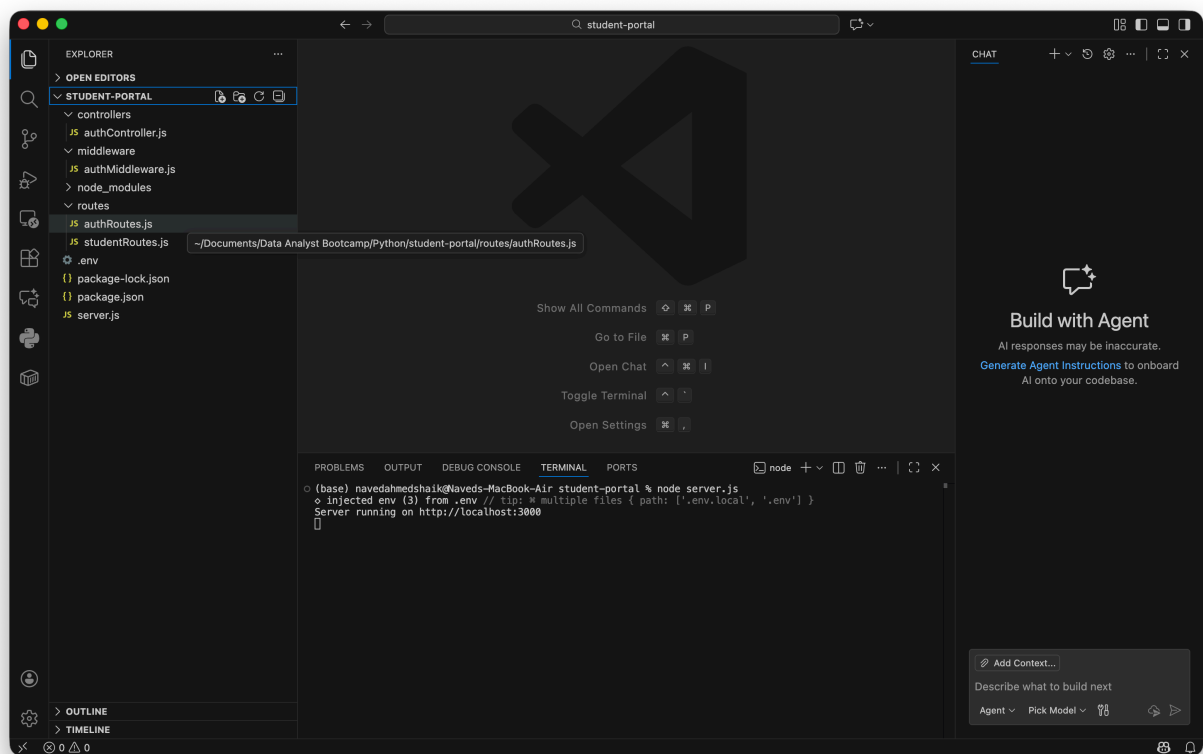

Scenario : College Student Portal Authentication using JWT

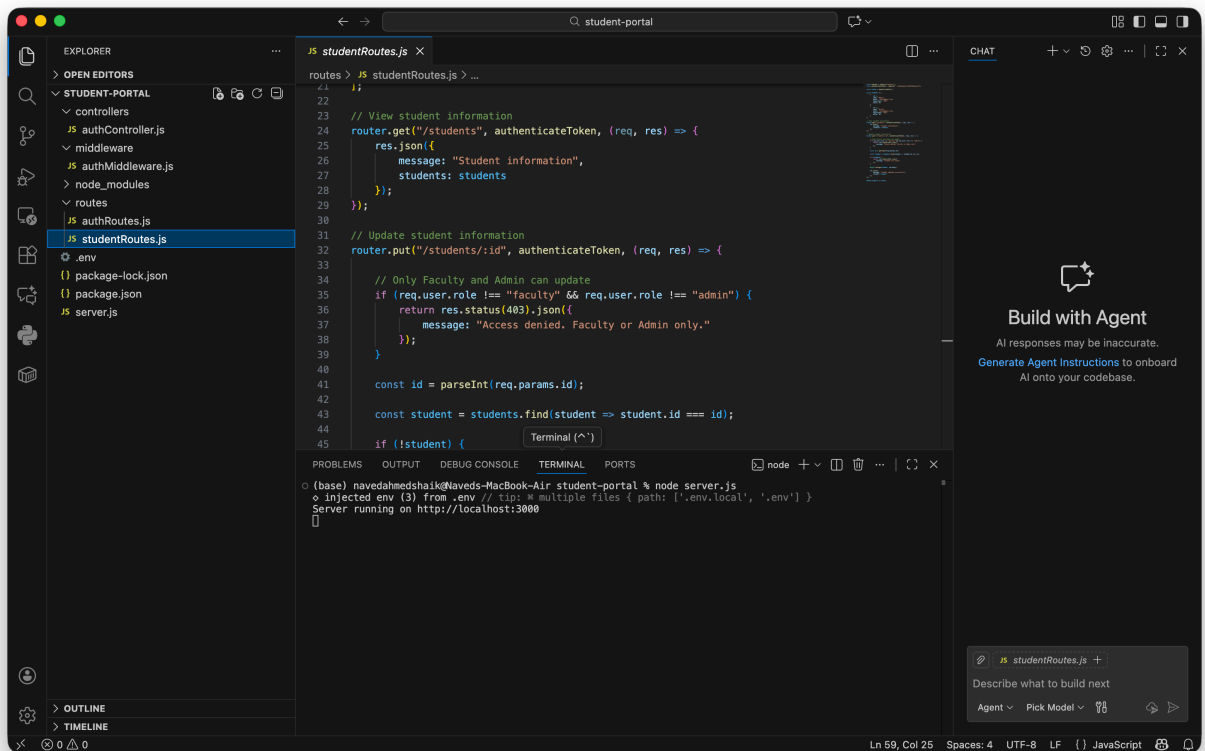

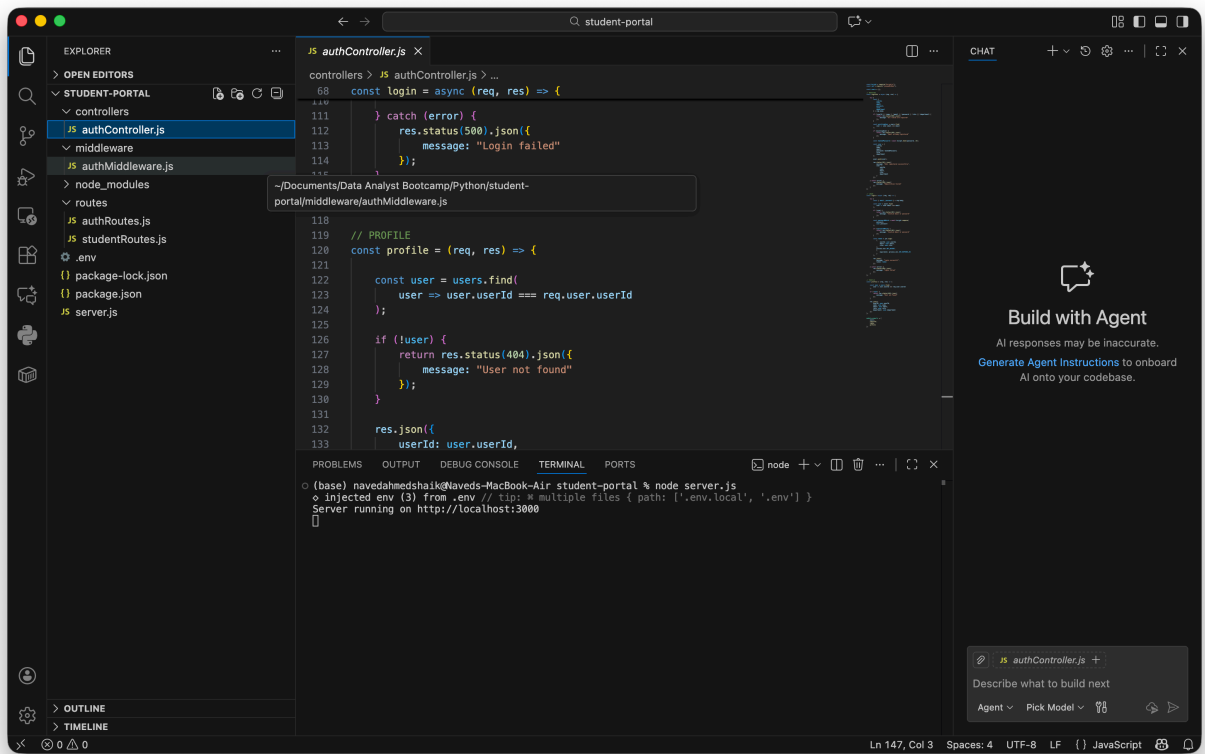

Scenario Description

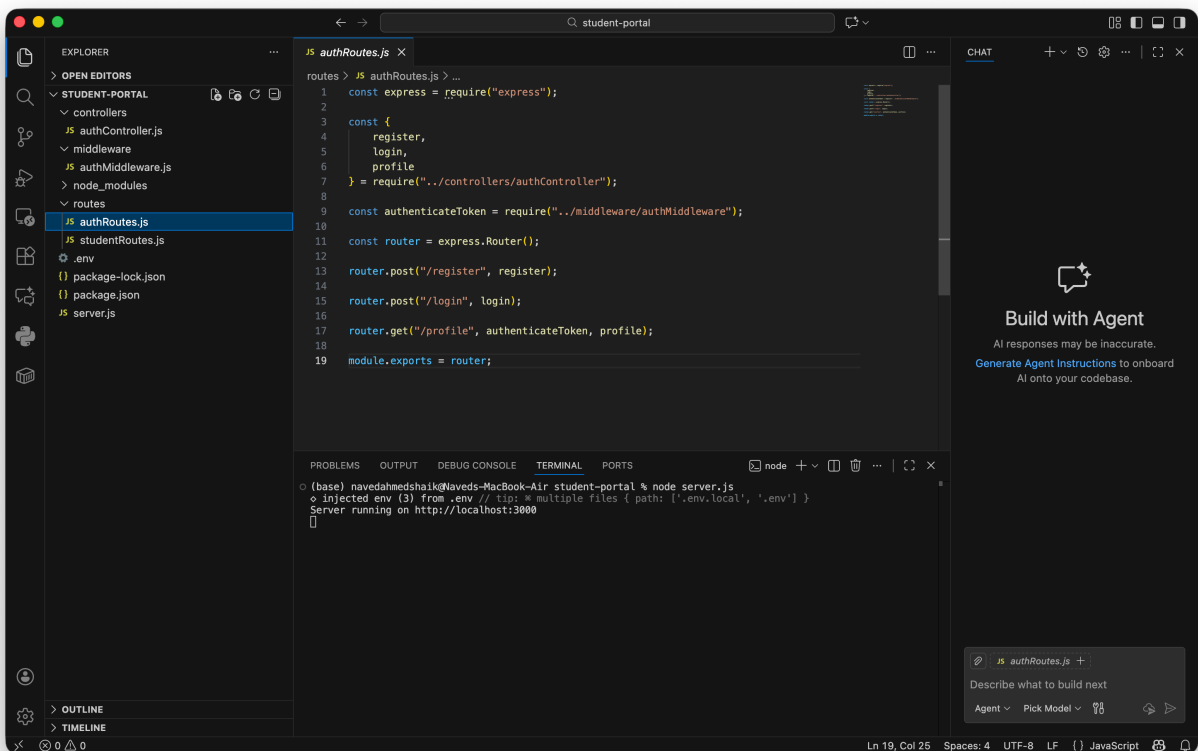

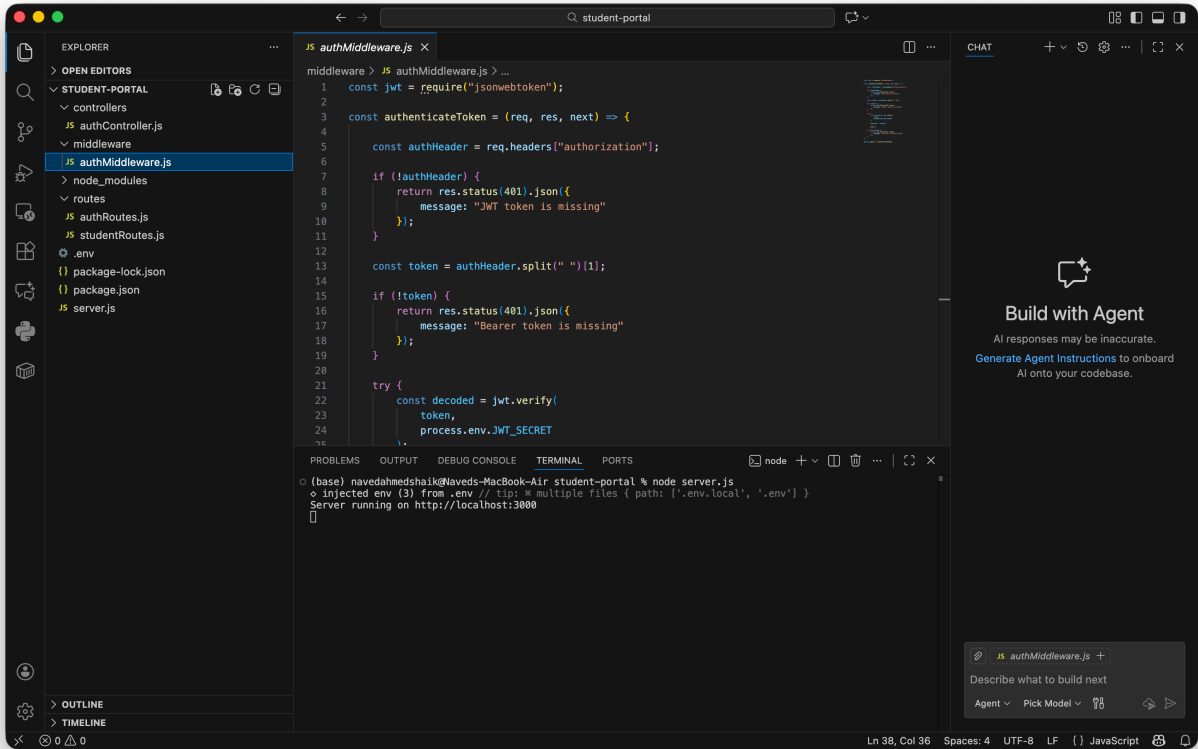

A college wants to develop a secure Student Portal using Node.js and Express.js. Students should log in to access their academic information, while faculty members should have additional privileges to manage student records. JWT must be used to authenticate and authorize API requests.

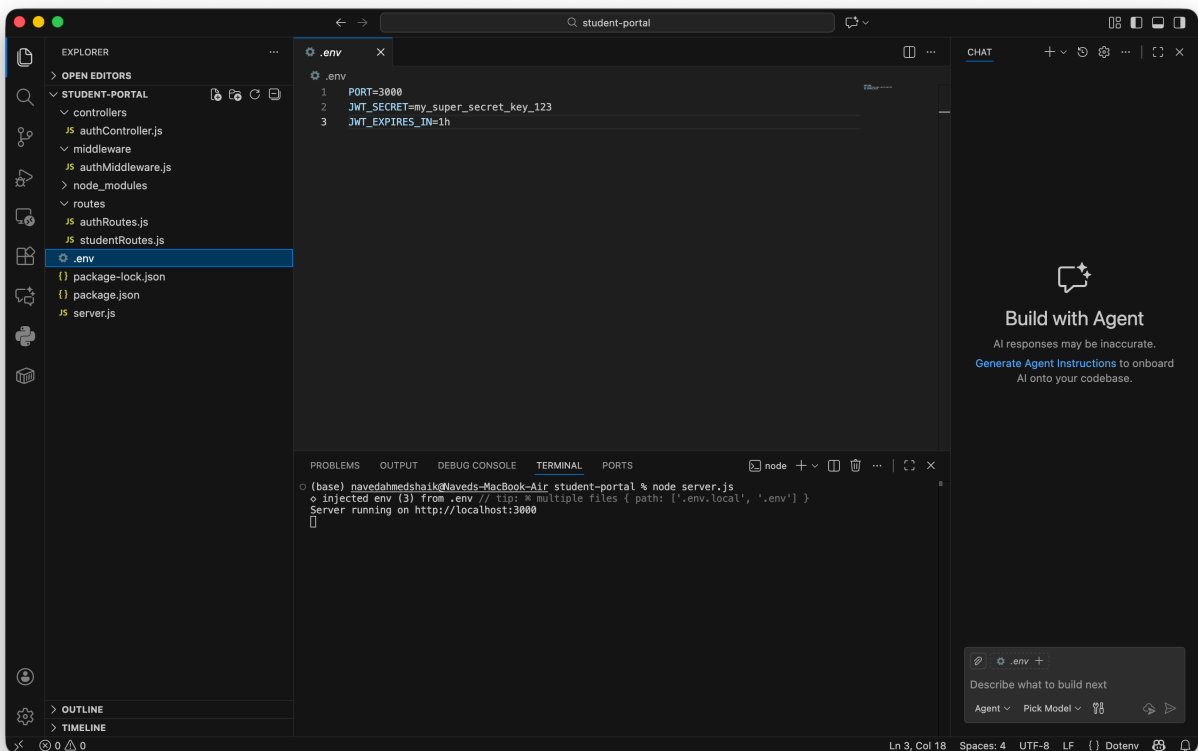

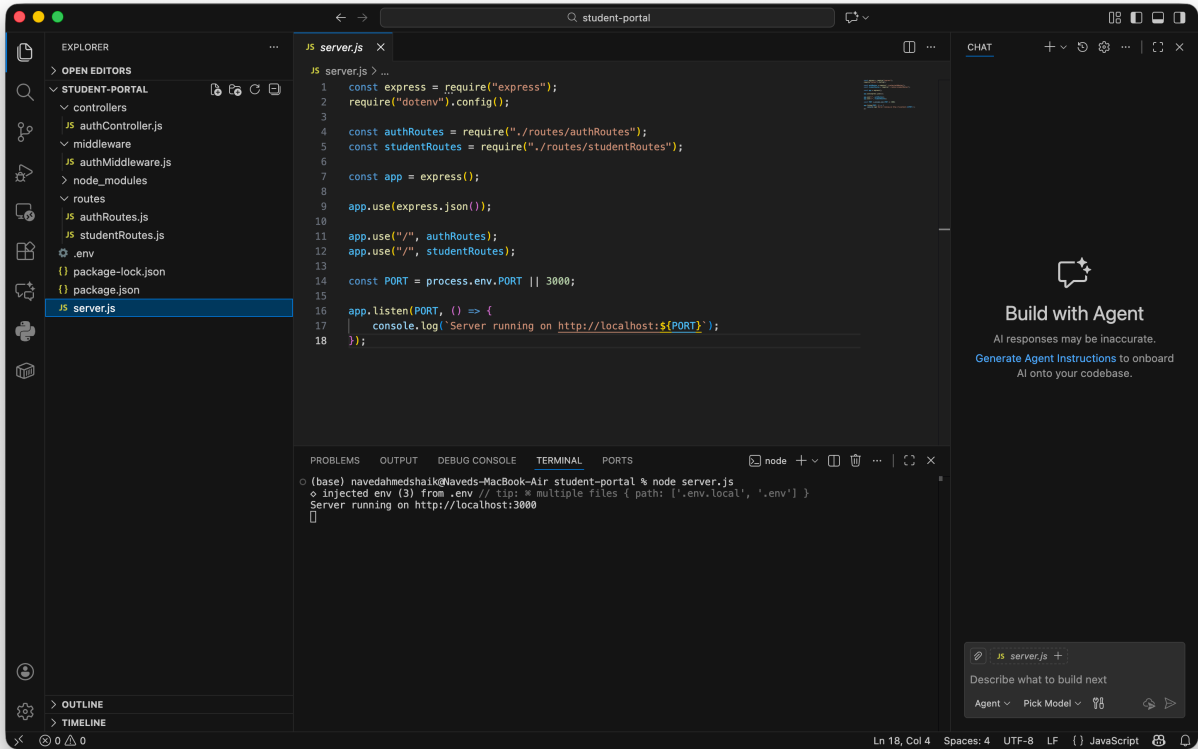

Student Portal Authentication – Implementation and Testing

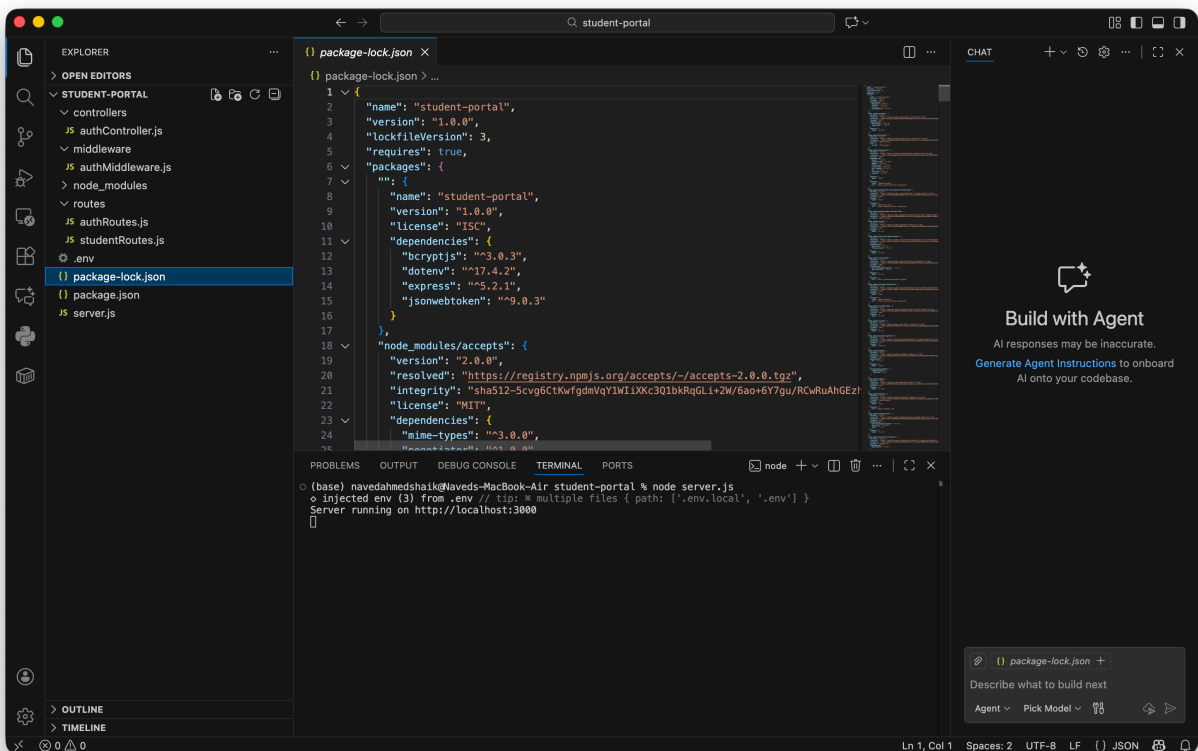

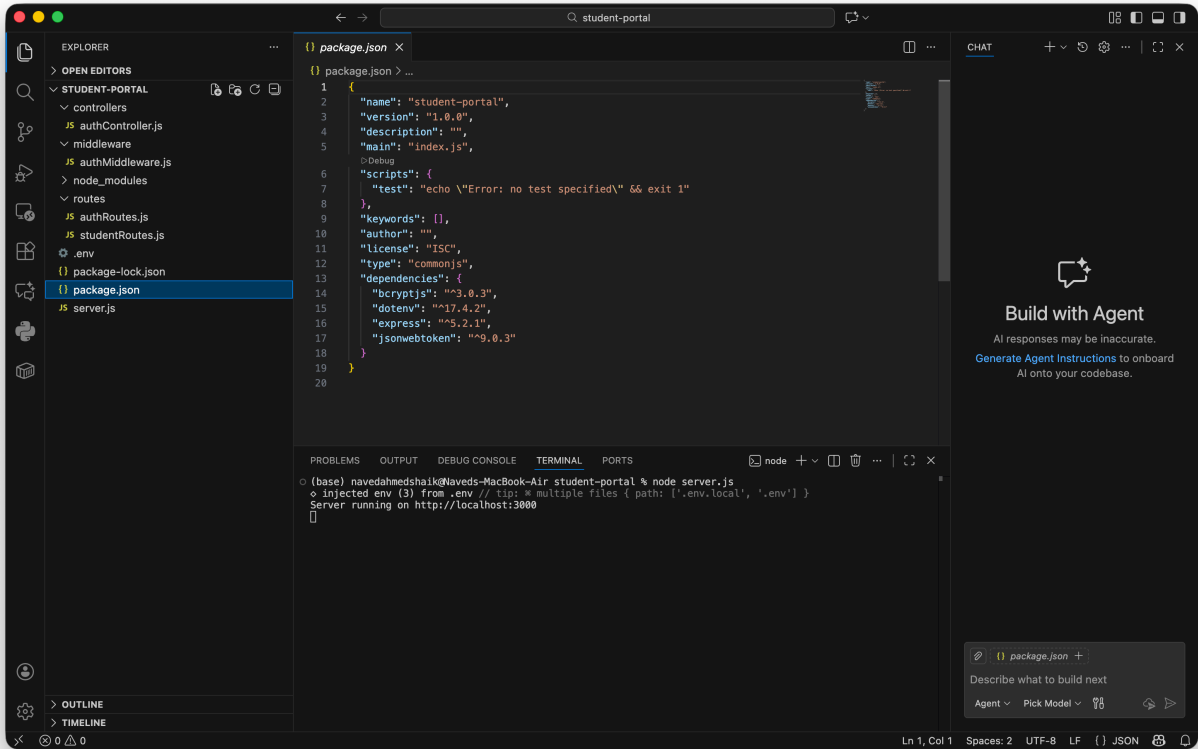

1. Implementation

2. Testing
